Since its establishment in 2021, **Unique IT Solutions** has grown at lightning speed and now has over 20 passionate members. Our goal is to provide superior information technology solutions that cater for different business requirements resulting in growth and change.

Having worked in web, app and custom software development for more than four years, we have become experts in our field. We create custom-made products which can satisfy the specific requirements of our customers thereby enabling them to stay ahead.

One could argue that our support teams alone are worth every penny because they're not just about delivering perfect products they go beyond completing a project by offering exclusive after-sales services that guarantee clients' continuous success.

WHAT WE OFFER ?

Workflow Automation

Make your business operations easy with our advanced workflow automation solutions. Forget about time-consuming manual routines and usher in improved effectiveness and productivity instead. Our automation emptying your precious time allows your team to concentrate on strategic, high-impact activities

Custom Software Development

We take the concept of custom software design very seriously. From planning through final implementation, our company works very closely with you towards creating software that addresses your specific need for growth. Our solutions are all scalable, adaptable and robust enough to grow as your company grows

WHAT WE OFFER ?

Hire Dedicated Developers

Enlarging your professional team is feasible by hiring an expert developer of ours who fits well with your project's crew. For any task at hand, our programmers can provide their expertise and hands-on experience temporarily or on a long-term basis. Grow your team immediately and effectively using flexible hiring models from us.

IT Consultancy

To handle the complexity of technology use our IT consultancy services. We help you align your IT infrastructure with business goals and protect it against possible security breaches as well any introduction of the latest technologies taking place around today! Working together with you, our consultants will understand the problem thereby finding ways of fixing them ensuring success within no time.

WHAT WE OFFER ?

Website Development

Having professional website development services will ensure that you establish a strong online presence. We design responsive, search engine-optimized websites that match your business objectives. Our designs for different purposes like e-commerce platforms or corporate ones aim at making people enjoy being online

UI/UX Designing

Our unique UI/UX designs have set up thousands of happy customers. We create visually appealing interfaces which improve user experience as well as engagement levels among users. Furthermore, these designs are not only beautiful but also useful hence ensuring smooth user journeys.

WHAT WE OFFER ?

ERP and CRM Development

Tailor-made ERP and CRM systems boost business efficiency and improve client relationships. Our integrated system delivers timely information for smarter decisions, streamlining your processes by eliminating unnecessary steps. Customized features enhance customer interaction and operational performance, ensuring smoother business operations overall.

Mobile App Development

To connect with the audience via their most loved devices, we utilize a full range of our mobile application development services for Androids and iOS. We provide user-friendly and feature-packed apps that serve both iOS and Android platforms created by a specialized team. Do you want a business app e-commerce platform? Just let us know, and we will send you an application that keeps the users engaged throughout the process.

How We Work?
